

## Instructions for Finding Your Entry Code:

Directors, when looking for your school code, click on the link and download the Texas Public School Directory. Scroll down to page 103. You will be looking at schools and school districts in El Paso County.

The school code is nine digits. Next to your school district address information on that page is a 6 digit number; those are the first 6 digits for the code!. Directly next to your school name are another three digits. Those are the last three digits for your school code.

So.....the entire code is:

6 digits from the school district number plus the 3 from your school name!

Please let me know if you have any questions.
